

- Keep personal phone numbers private when dialing clients.
- Enable staff using personal phones or direct lines to mask their number with the Ivrnet Unified Messaging (UM) number
- Simply call into your Ivrnet UM number, follow the prompt and dial the number you want to connect to
- The party receiving the call will see the UM number and not the personal phone number
- If the party was to call the number back, it can be set up direct to a phone number of your choosing such as an office line, call centre, cell phone or to disconnect
